

Panel and Equipment Surge Protector

**Installation Instructions**

1. Confirm device is rated for your system by metering the system voltages and compare the results to the SPD's specifications listed on the product label.
2. Turn off all power supplying installation location.
3. Install according to your specific installation application, using the appropriate diagram examples shown.
4. When installing as a Type 2, use a 20A-60A breaker. Verify lug on breaker provides solid connection to SPD wiring.
5. As a Type 1, no breaker is required.
6. Install in accordance with all pertinent articles of the National Electric Code.
7. Confirm that the electrical terminals used to attach this device are identified for these conductors.
8. Keep conductor lengths as short as possible with no sharp bends or kinks.
9. Do not loop or coil wires.
10. Ensure that a high quality ground is in place.
11. Turn on all power supplying this equipment.
12. Verify all diagnostic indicators are illuminated and no audible alarm is present.

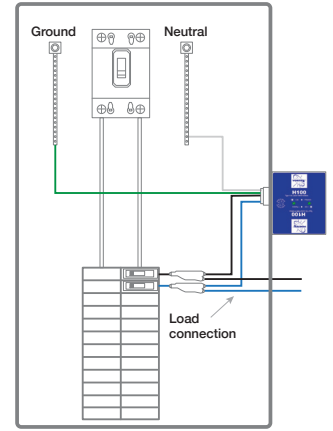

**\* Diagram A Type 1 Disconnect (Breaker not required)**

**Diagram B Type 2 Main Panel (Breaker Required)**

**Diagram C Type 2 Main Panel (3-Way Connector) (Breaker Required)**

**Installation Notes**

- Designed to allow installation inside an electrical panel using optional mounting bracket or double-sided tape.
- Designed to allow installation inside of a finished wall using optional flush mount cover.

**Diagnostic Operation**

- LED ON = Normal operation
- LED OFF (one or more) = Fault, check phase, check voltage & connections. If OK, replace unit.
- Audible Alarm ON = check phase

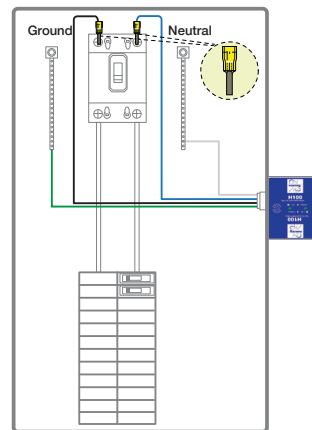

**\* WHEN INSTALLING TYPE 1 SURGE PROTECTOR ON MAIN LUGS, USE THE UL LISTED FLAT BLADE TERMINALS PROVIDED. IMPORTANT: FLAT BLADE TERMINALS MUST BE INSTALLED UNDER MAIN CONDUCTOR AND NOT BETWEEN THE CONDUCTOR AND LUG SCREW TERMINAL TO CONFORM TO PROPER INSTALLATION STANDARDS. USE ONLY THE TERMINALS SUPPLIED, IF TERMINALS ARE DAMAGED OR MISSING CONTACT PSP PRODUCTS INC. FOR REPLACEMENTS.**

# Category 2 Hurricane Warranty

## PSP Product Warranty Category 2 Hurricane Residential SPD Lifetime Product Coverage

PSP will, at its sole discretion, repair or replace any Category 2 Hurricane Residential Surge Protection Device (SPD) that is defective or is damaged by a transient electrical spike (including those caused by lightning) for the lifetime of the product from the date of installation by the original owner or owner of record of premises.

### Down Line Coverage

PSP Products Inc will repair or replace (whichever is less) electrical appliances and electronics that are damaged by transient electrical spike in your home. Maximum coverage per household: \$100,000. Coverage is applicable only if the SPD was fully functional immediately prior to the claim event, and properly installed per the installation instructions. SPD must have sustained surge damage as a result of the claim event. External items that are mounted outside of the house are covered under this warranty only if the surge is found to have originated from the main circuit panel due to SPD failure. It is highly recommended to install additional SPDs in order to best protect your outside appliances or devices. Electronic devices or appliances that are connected to phone lines, data lines, coax connections, cable, antennas, satellite receivers or any other external connections, must have an SPD for each connected device, otherwise coverage for any unprotected equipment will be excluded. This warranty does not cover charges for diagnostic fees or any installation, service charges or shipping of damaged SPD to PSP. Damage claims must be made within 15 days of the occurrence and the damaged SPD returned to PSP within 15 days of the occurrence to return with the original purchase receipts of the items damaged. Returned damaged SPD require a Return Authorization (RA) to be assigned by PSP Products prior to receiving, as well as a completed PSP Claim Form. The damaged unit must be determined to have failed based on PSP's test procedures. This coverage is secondary to any applicable warranties, service contracts and all other insurance if the claim is found to be valid, PSP Products Inc. will pay up to the deductible amount of the home owners insurance or the cost of the damage, whichever is less. The reimbursement is limited to \$1,000 per item. All of the above conditions must be met in order to have a valid claim. The above coverage applies to the user only and is the exclusive remedy under this warranty, whether based on contract, tort, including negligence, or otherwise. PSP reserves the right to audit damage, site and/or cost of repairs and may require a notarized proof of loss. Claims must be made within 15 days of damage. This warranty does not cover damage associated with sustained over voltages, vandalism, theft, normal wear and tear, obsolescence, abuse, unauthorized modification or alteration, misuse, improper installation or catastrophic events including direct lightning hit. Except as expressly provided by this warranty, PSP disclaims liability for any incidental, indirect, special or consequential damages arising out of the sale or use of any PSP products (including without limitation: lost business profits, loss of data and all freight, mileage, travel time and insurance charges associated with warranty coverage claims). Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may have other rights which vary from state to state. *This warranty is valid in the United States and Canada only.*

**Caution: Effective surge suppression requires correct wiring. All surge protection devices must be properly grounded for the warranty to be honored.**
