

Installation Instructions

1. To assure proper installation measure the voltage on each phase and insure the correct device has been selected for your installation.
2. Turn off power to circuit where surge protector is to be installed.
3. Mount device so as to keep conductor length as short as possible. Cut wires to length and connect to circuit per wiring diagram below avoiding sharp bends or looping.
4. Reinstall covers, restore power and confirm diagnostic LED is illuminated.

**All surge protection devices require good ground connection for effective operation*

Diagnostic Operation

- LED ON = System Protected
- LED OFF = Replace Device

Device Ratings	VA1S-050-4XP	VA4S-050-4XP	VA5S-050-4XP
Normal Voltage	120 VAC	240-277 VAC	480 VAC
Max. Operating Voltage (MCOV)	150 VAC	320 VAC	550 VAC
Max. Discharge Current (Imax)	50 kA	50 kA	50 kA
